

Yekta Phosphate Espadana

○ About Our Company

Yekta Phosphat Espadana is dedicated to excellence in the production of high-quality di-calcium phosphate (DCP), a vital nutrient for agriculture and animal nutrition. Our mission emphasizes the need for safe, effective, and sustainable products, positioning us as an industry leader that responds to the growing demands of the global market. With a strong foundation built on years of experience and scientific knowledge, we ensure each product reflects our commitment to quality and

○ Di-Calcium Phosphate producer (DCP)

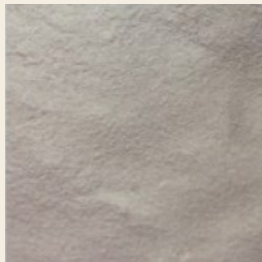

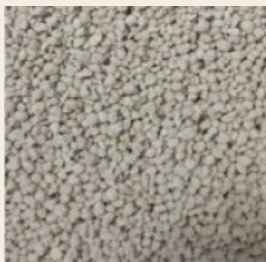

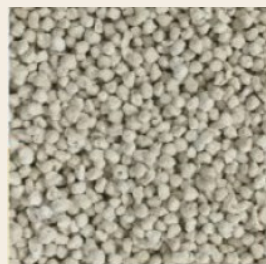

Di-Calcium Phosphate is a crucial supplier of two essential elements: calcium and phosphorus. These elements play a vital role in biochemical and metabolic processes such as blood coagulation, cardiovascular function, cellular exchanges, neurological and muscular activity, skeletal growth and strength, and overall digestion for livestock and poultry.

Our DCP is expertly formulated to balance the ratios of calcium and phosphorus in animal feed, with a particular focus on phosphorus supply, which is critical for optimizing growth and productivity. An adequate calcium-to-phosphorus ratio in the diet is essential for enhancing bone development, improving production efficiency, and

○ Benefits

- **Enhanced Nutritional Value:** Our DCP provides the ideal balance of calcium and phosphorus, crucial for optimal metabolic functions, leading to improved growth rates in livestock and better egg production in poultry.
- **Versatile Applications:** With applications across animal feed, fertilizer, and food products, our DCP caters to various industries, ensuring a comprehensive nutrient supply.
- **Eco-Friendly Production:** Committed to sustainable practices, we focus on minimizing environmental impact while maintaining the highest quality in our production processes.
- **Quality Assurance:** With our extensive experience and scientific foundation in production, our DCP stands out in terms of quality. We ensure that our product meets the specific needs of both farms and feed processing facilities, reinforcing our status as a reliable supplier in the industry.

○ Provider of various powdered and granular samples

○ Commitment to Quality

At Yekta Phosphat Espadana, quality is at the forefront of our operations. Our DCP undergoes rigorous testing and quality control to ensure it meets the highest safety and effectiveness standards. We are committed to producing superior products that not only meet industry regulations but also exceed customer expectations and needs. With a foundation built on expertise, we produce DCP that is exceptional in quality and tailored to effectively meet the nutritional demands of livestock and poultry. Here is our product analysis presented in detail:

Analysis

Analysing Items	Unit	Standard	Result
Total Phosphorous (P)	Weight %	Min 17	17.2
Citric Acid Soluble P/ Total P	Weight %	Min 85	87.9
Calcium (Ca)	Weight %	21-25	23
Fluorine (F)	Mg in Kg	2000 max	830.3
Arsenic (As)	Mg in Kg	13 max	5.2
Plumbum	Mg in Kg	15 max	<0.05
Cadmium	Mg in Kg	15 max	3.56
PH Value	-	4-7	5

○ Export Capabilities

Yekta Phosphat Espadana actively engages in international markets, ensuring our high-quality DCP reaches customers around the world. Our robust logistics capabilities allow for timely and efficient delivery, providing support to our clients in every corner of the globe. We pride ourselves on being a trusted partner in the supply chain, dedicated to fostering long-term relationships based on reliability and excellence.
